

## List of critical CO<sub>2</sub> vehicles, model year 2016

Note: this list refers to vehicles possibly affected by the CO<sub>2</sub> issue (as at November 19, 2015). The ongoing review has since established that contrary to initial assumptions, some of these vehicles are not in fact affected by the CO<sub>2</sub> issue. This applies, for example, for the Caddy, T6 and Audi A1 models. Over the coming weeks, further vehicles on the list will be investigated to establish whether they are actually affected. We would therefore ask you to note that changes in the list are possible at any time as the ongoing internal investigation progresses.

The CO<sub>2</sub> issue has been added to the customer information pages on the brand websites. Customers can find out whether their vehicle is affected by entering their Vehicle Identification Number (VIN). For example, the link for the Volkswagen brand in Germany is [www.volkswagen.de/info](http://www.volkswagen.de/info).

Car	Engine	Gearbox	Audi	Seat	Skoda	Volkswagen	Total
